

# Curriculum Vitae

Navarone Ismail

## About

A full stack developer from Amsterdam willing to contribute to software applications, with a background in developing on both LAMP and WAMP stacks. I communicate well, and enjoy working in a team, although I can work well independently.

I've been a programmer since I was 11, developing the school's forum and other small projects. Since I turned 16, I took it more professionally, creating web applications for various smaller companies.

...and I loooove cats ❤️
